NEW ENGLISH CHRYSANTHEMUMS

STOCK CLUMPS

Those of you who ordered these Chrysanthemums from us last year need no introduction to them. These Chrysanthemums are early blooming, making it possible to raise them where Chrysanthemums have never been raised before.

If you are looking for something to pep up your catalogue or price list for your retail sales, these will certainly do it. We sell more of these new Chrysanthemums retail than all other perennials together.

These can be grown without disbudding but if you will grow them disbudded down to 8 to 12 blooms to the plant it is almost unbelievable the lovely flowers you can raise.

We have a very limited number of Stock Clumps to offer this fall. If you buy Stock Clumps now and plant them in the greenhouse they will soon start throwing side shoots and you can grow enough rooted cuttings to give yourself a good start to plant out by spring. We have always paid from 20c to 50c each for small rooted cuttings, besides the import duty on them, so you have a wonderful opportunity to get a good start reasonable.

Please get your order in early as help is scarce and it will help us to have your orders in early.

These are nice field grown clumps. Most of them will have several strong side shoots on them.
